

avast! Email Server Security

With new cloud-based streaming updates, avast! Email Server Security, now not only provides vital protection for your company's mailbox servers (including Microsoft Exchange Server), but that protection is now more up-to-date than ever – shielding your data from even new “zero-day” threats. Additionally, licenses can now be purchased on a per-server basis, offering you even greater flexibility.

Key Features – avast! Email Server Security

ANTIVIRUS AND ANTI-SPYWARE ENGINE

Innovative scanning engine protects against viruses, spyware, and other malicious agents.

new! STREAMING, REAL-TIME VIRUS DATABASE UPDATES

Now you get each virus signature sent to you in real-time via connection to the AVAST Virus Lab cloud, rather than needing to wait for a traditional database update. Your database will be continuously updated with the latest definitions.

ANTISPAM

Antispam for Microsoft Exchange servers 2007/2010 with latest Service Pack.

HEURISTICS ENGINE

Proactively finds malware which is undetectable with normal definitions and virus signatures.

INTELLIGENT SCANNER

Reduces the number of required file scans up to 80% through a white list of safe applications. Files identified as safe are not rescanned unless they change.

GREEN COMPUTING

Leaves a minimal footprint due to its efficient and effective technology.

MULTI-THREADED SCANNING OPTIMIZATION

Allows the splitting of large files between cores, which accelerates the scanning process on new multi-core CPUs and makes avast! run even faster.

CODE EMULATOR

Uses dynamic translation (much faster than traditional emulation) for both generic unpacking and within the heuristics engine.

SIMPLE ATTACHMENT BLOCKER

Blocks attachments based on their file extension.

EXCHANGE PLUG-IN

For tight integration with the Exchange server.

BACKGROUND SCANNING OPTION

Scans without impeding day-to-day operation of the server.

SYSTEM REQUIREMENTS:

Windows 2008/R2, 2003 server,
Windows SBS 2011, 256/512 MB RAM,
200 MB of free hard disk space

Microsoft Exchange server
2003/2007/2010

CERTIFICATION:

NOTIFICATION MANAGER

Built-in and customizable, to ease your workload.

EASY TO NAVIGATE GRAPHICAL INTERFACE (GUI)

Offers a user-friendly central window to all program functions.
